Memo

Date: August 23, 2006

To: Distribution

From: Joel Scott

Subject: Safety Walk

On August 22, 2006 a Safety Walk of the removal of the REF stack next to the BLIP building was performed. The task performed was to remove the stack and fan motor housing and deliver the pieces to the suspect metals yard. The task was performed following Work Request # SS-2006-151 guidelines.

Safety Walk Attendees

L. Campione (C-A Waste Tech., EWMSD)
J. Scott (C-AD Environmental Coordinator, C-A)
A. Anderson (PE Rigger, PE)
R. Johnson (PE Hemo, PE)
R. Medina (PE Rigger, PE)
J. Tabbacco (PE Rigger, PE)

Positive Observations

Pre-job briefing performed to review tasks and hazards
PPE available and used at all times (hard hats, gloves, safety shoes, fall protection harness)
Road blocked to traffic correctly, site advised of road closure day before.
Pre-use inspections of mobile crane, man-lift, and rigging to be used performed prior to work.
Work request work plan followed correctly and completely.

Negative Observations

No negative observations were noted during this work.
