

Memo

Date: *March 14, 2006*

To: *Distribution*

From: *Melvin Van Essendelft, Environmental Compliance Representative*

Subject: *Safety Walk*

On March 14, 2006 a Safety Walk of the C-A Waste Yard was performed. The task performed was waste packaging of PCB ballasts for disposal through Waste Management. This task was reviewed in conjunction with the annual review of the Waste Yard Facility Risk Analysis (FRA).

Safety Walk Attendees:

L. Campione (C-A Waste Tech, EWMSD)
J. Williams (C-A Rad Tech, RCD)
M. Van Essendelft (C-A ECR, EWMSD)
J. Scott (C-A Environmental Coordinator)

Positive Observations:

- Pre-job briefing performed to review tasks and hazards
- Area materials properly segregated and neat
- Use of PPE including safety glasses and gloves
- Proper procedure followed in surveying waste
- Waste container properly labeled

Negative Observations:

- There is no electrical power in the Waste Yard building to operate bulb crusher, saws and any equipment necessary in waste packaging operations. Currently the technician must drag a long power cord outside the building to an outlet some distance away from the building.
- Outdated Rad Waste Posting (SBMS)
